<b>Reason:</b>	<p>Zimmerspringbrunnenpumpen anzuwenden.</p> <p><i>Neither in H03VV-F (60227 IEC 52), nor in H05VV-F (60227 IEC 53) appropriate requirements for permanent water-resistance are currently defined: Despite the many years use of PVC cables in such pumps no safety problems have been known. The AK 511.11.6. has determined to apply the test methods described in DIN EN 50525-2-21:2012-01 Appendix D and E, as evidence of permanent water resistance of the connecting cables of aquariums and indoor fountain pumps.</i></p>
<b>Entscheidung</b> <b>Decision</b>	<p><b>Der Lösungsvorschlag ist angenommen 2014-04-15</b> <b>Für die Umsetzung gilt Kategorie C nach AD06.</b></p> <p><i>Proposal of solution is accepted 2014-04-15.</i> <i>For implement the category C according to AD 06 is essential.</i></p>
